

GoodData for HR and Workforce Management Platforms

Whether you're building an HRIS, payroll, or performance management solution, GoodData helps you stand out with advanced analytics that drive smarter people decisions.

Get operational intelligence

- Gain advanced insights into workforce demographics and trends.
- Use AI-powered forecasting to predict attrition and align staffing with business demand.

Improve hiring efficiency

- Analyze data on recruitment channels, candidate sourcing, and hiring outcomes.
- Reduce recruiting costs and improve retention strategies.

Better understand team performance

- Use interactive dashboards to identify high performers, skill gaps, and issues.
- Monitor individual progress against personal and company goals.

Optimize workforce costs

- Identify cost savings potential without compromising productivity.
- Easily track areas like training costs and employee benefit use.

Discover how Elevate's workforce management platform uses GoodData to deliver powerful visualizations, flexible filtering, and custom builds.

“GoodData allows us to provide more meaningful metrics that tell a story and to give those visualizations to our clients.”

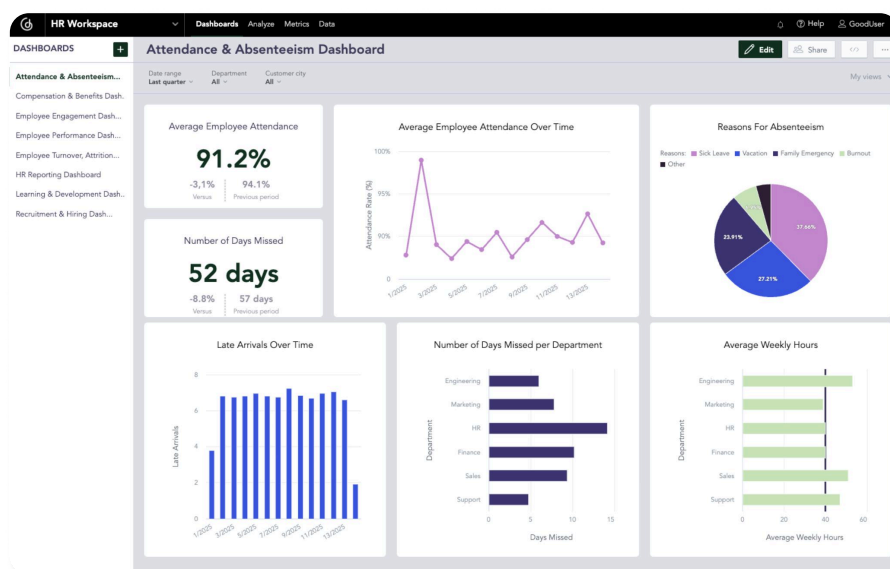

Valerie Kelly

VMS Senior System Analyst, Elevate

Why Choose GoodData?

- Seamless embedding: Integrate dashboards, reports, and self-service analytics directly into your product with a fully white-labeled experience..
- Built-in AI tools: Detect patterns, generate insights, and explore workforce data using natural language.
- Easily scale: Handle increasing data volumes, users, and clients with a multi-tenant architecture that keeps analytics fast and responsive at any scale.
- First-class security and compliance: Meet enterprise-scale HR requirements with features that ensure data governance, privacy, and auditability.
